2. Reasons for the Revision

Although the Company faces cost increases due to factors such as the sharp rise in semiconductor memory prices, net sales, operating profit, ordinary profit, and profit attributable to owners of parent are expected to exceed the previously announced forecasts after taking into account U.S. tariff refunds, foreign exchange rate trends, future sales prospects, and other factors.

The dividend forecast remains unchanged from the initial forecast, in line with the shareholder return policy under the Mid-term Management Plan.

Note: The above forecasts are based on information currently available to the Company and certain assumptions. Accordingly, the actual results may differ from these forecasts due to various factors. If revisions to the earnings or dividend forecasts become necessary due to future changes in the business environment, the Company will announce updated forecasts in a timely manner.
